Pharmacovigilance Associate (PV Associate)

This program offers short course and training designed for professionals who want to get an up-to-date, quick and solid knowledge, from experts. It offers an opportunity to start and develop your career in Drug Safety. In accordance with the current guidelines, you will have to report adverse events (AEs). This program will help you in analysing the side effects of drugs and monitor the safety of drugs available in the market. The responsibilities of Pharmacovigilance Associate include conducting the risk-benefit analysis; tracking all drug related reports; reviewing and assessing all drug related documents; entering database reports and performing label assessment. This program is devised with an all-intensive and thorough research to impart complete conceptual knowledge. A Pharmacovigilance Associate (PVA) role may also be called a Pharmacovigilance Officer, Drug Safety Officer (DSO), Drug Safety Associate, or a Patient Safety Specialist. This short course is built so that students are grounded in real job market and today's practices.
